Please enter the Mankato Clinic front door (marked #50)

### **Please check in at the Diagnostic Imaging Department.**

If you are unable to keep your appointment or have questions, please call (507) 389-8570.

### **What is a Renal Transplant Ultrasound?**

A renal transplant ultrasound uses sound waves, not radiation, and an instrument called a transducer, to obtain images of your kidney transplant and the blood flow in and around your transplant.

### **How do I prepare for the test:**

- 6 hours prior to your test, **DO NOT** eat anything. This includes no smoking and no chewing gum.
- 6 hours prior to your test, you may only have water to drink.
- Take any morning medications with water.
- We recommend that you contact your insurance company prior to your appointment to understand what your coverage is for this test.
- To provide the best service and ensure your safety, young unsupervised children should not accompany parents to their Ultrasound appointments. Safety practices limit the number of people in the testing room and young children are not to be left unsupervised while in the waiting room or lobby. This will also ensure you can relax during the test which will result in better image outcomes.
- Arriving late, or not following the above preparation instructions, may result in rescheduling your test.

### **What will happen during the test:**

- You will be asked to undress. A gown will be provided.
- You will be asked to lie on a bed.
- This test may take up to 60 minutes to complete.
- Warm gel will be placed on your abdomen and/or pelvic areas depending on the location of the transplant.
- A transducer will be moved around on your abdomen and/or pelvic areas during the test.
- At times you will hear loud noises that sound like heartbeats as the sonographer listens to the blood flow.
- The sonographer will take several images.

### **Instructions for after your test:**

- You may resume your regular routine unless you have been given other instructions.
- The final signed report will be sent to the provider that ordered your test.
- Your test results will be available in your patient portal immediately after your provider reviews them. Your provider will discuss the results with you at your follow-up appointment. If you do not have a follow-up appointment, your provider will contact you by letter or phone within five to seven business days.
